

■ DESCRIPTION

AA3413 is a high output current, high output voltage swing and high gain operational amplifier capable of driving 40mA. The IC is available in 5-pin SOT23 package.

■ FEATURES

- Bipolar Technology
- Provided in SOT23-5 package
- Single Power Supply
- Wide Operating Voltage from 3V ~ 15V
- Capable of Driving 40mA

■ APPLICATIONS

- Audio
- Digital Photo Frame
- Portable Digitals
