

DESCRIPTION

AA3414L is a high output current, high output voltage swing and high gain dual operational amplifier capable of driving 70mA. The IC is available in 8-pin TSSOP package.

FEATURES

- Bipolar Technology
- Provided in TSSOP-8 package
- Single Power Supply
- Wide Operating Voltage from 3V ~ 10V
- Capable of Driving 70mA
- 2.7 V/us Slew Rate

APPLICATIONS

- Audio
- Digital Photo Frame
- Portable Digitals
